

Transport Problems

INTERNATIONAL SCIENTIFIC JOURNAL

Volume 12 Issue 3

CONTENTS

	Page
1. Bosyi D., Kosariev Ye.: Modeling of the controlled traction power supply system in the space-time coordinates	5
2. Voropai V.: Development of a design-experimental methodology for the prediction of reliable exploitation of freight railway cars	21
3. Ivanov I., Evseev D., Ovsyanikova I., Tarapanov A.: Analysis of forming tread wheel sets	35
4. Drożdziel P., Wińska M., Madleňák R., Szumski P.: Optimization of the position of the local distribution centre of the regional post logistics network.....	43
5. Lališ A.: Time-series analysis and modelling to predict aviation safety performance index	51
6. Kadyrov A., Balabekova K., Ganyukov A., Akhmediyev S.: The constructive solution and calculation of elements of the unified module of the mobile bridge overcrossing	59
7. Wieczorek A.N.: Possibilities of increasing the durability of chain wheels of armoured-face conveyors	71
8. Blyankinshtein I., Askhabov A., Voevodin E., Kashura A., Malchikov S.: Concept and models for evaluation of black and white smoke components in diesel engine exhaust.....	83
9. Malichova E., Durisova M., Tokarcikova E.: Models of application economic value added in automotive company	93
10. Andrzejczak K., Selech J.: Quantile analysis of the operating costs of the public transport fleet	103
11. Melnik R., Sowiński B.: Analysis of dynamics of a metro vehicle model with differential wheelsets	113
12. Kozlov P., Vakulenko S., Tushin N., Timukhina E.: Model to calculate the optimal mode of train locomotive turnover.....	125
13. Flekiewicz M., Kubica G.: The influence of selected gaseous fuels on the combustion process in the SI engine	135
14. Pencheva V., Asenov A., Topchu D., Beloev I., Evstatiev B.: Organisation of the work on collecting routes in postal activity through an automated system for collection of information.....	147
